Experience

Full Stack Developer, Touchcore Systems – Pune, India Apr 2023 – Present

- Developed clinical software focusing on frontend development with Vue.js, collaborating closely with the development team.
- Researched and implemented Azure AI Translator, utilizing C#.NET for backend integration to facilitate localization.
- Refactored existing code, removed 50% deprecated code and redundant HTML elements, and improved production build speed by over 70% (from 5 minutes to under 1 minute 30 seconds).

Application Developer, Mezmedia – Singapore Jan 2023 – Apr 2023

- Led the development and maintenance of ed-tech solutions using React, Node.js, PHP, and Laravel, increasing system reliability by 30%.
- Actively involved in the deployment and management of CI/CD pipelines, supporting smooth and efficient weekly/bi-weekly deployments.
- Implemented Config Driven UI specific for each client, enhancing customization and user experience across different clients within the same project.
- Implemented Agora RTM, significantly enhancing real-time communication and engagement.
- Led the transition from a monolithic React application to a Microfrontend Architecture.

Full Stack Developer, Quality Zone Technologies – Singapore Mar 2022 – Jan 2023

- Developed comprehensive web solutions using Ionic and Angular for the front-end, and Node.js and Express for the back-end, ensuring robust performance and scalability.
- Implemented JWT based authentication mechanism for secure and access.
- Contributed to the development of an e-commerce application, integrating Lalamove for efficient delivery logistics and Stripe for secure payment transactions.
- Identified and resolved performance as well as scalability issues.

Frontend Developer, Bright Enterprises – Bhopal, India Dec 2019 – Mar 2022

- Designed and developed user-friendly interfaces for web and mobile platforms using Angular and React.js, significantly enhancing user engagement and accessibility.
- Extensively improved page performance and Core Web Vitals, resulting in a steady improvement in user engagement and a significant boost in SEO page ranking.
- Developed performance-focused mobile application UI with the Ionic framework, ensuring a seamless and responsive user experience across devices.
